A good diet cookbook to have for those who don't have time to go on picking out what to cook from a large selection of recipes. It even has a daily guide of what recipe to cook in a 2 week span. Zone Diet was a compilation of different short reads on the subject. It started off with the promised 50 recipes that were mostly vegan. The second mini-ebook was on the basics of zone diet with a 7-day meal plan and the next was pretty much the same. The layout could use some work since I bought the digital copy. The recipes, however, seem doable and would likely grace out table tonight.
