I’m new to the whole preparedness movement and as such I’m always seeking new ideas. This book contained a lot of information. Some of it is more useful than others but that will vary from person to person. I recommend getting this and reviewing the information contained therein.

I am interested lately in options for growing my own plants, trying to integrate in my diet more and more healthy food. As I know close to nothing about gardening, I am trying to develop my knowledge about this following a step by step approach. Reading about perennial vegetables is not accidental actually, as garlic is one of my favorite vegetables and it is one of the vegetables among this category, so I would like to start off my practice with this. I found this guide to be very helpful in providing a quick introductory overview of what is required and what is suggested to have whenever considering planting vegetables in a garden.

I’m new to homesteading and permaculture. This book helped me with planning my garden as I had no idea what to plant being a “city slicker.” Knowing which fruits, vegetables and herbs to plant that don’t need to be sowed year after year is a wonderful help.
