The South Beach diet was developed by Dr. Arthur Agatston, while he was practicing as a cardiologist at the Mount Sinai Medical Center in Miami, Floridaâ€”hence its name for the popular beach area in Miami filled with fit, slim people. Agatston worked with Marie Almon, who was the chief dietitian at Mount Sinai. Agatston created the South Beach diet to meet the needs of his own patients, who were not necessarily becoming healthier or losing weight with dietary recommendations from the American Heart Association, which at the time, advised eating a low-fat, high-carbohydrate diet. What started as a local phenomenon turned into an international success, as both patients and Agatston spread the word of his new eating regimen. In 2003, Dr. Agatston published the first book on the South Beach diet, and the plan has been updated since then, as new findings have allowed for fine tuning for better results.
