Build Your Own Inexpensive Dollhouse (Dover Woodworking)

E. J. Tangerman

Build Your Own Inexpensive Dollhouse

With One Sheet of 4' x 8' Plywood and Home Tools

Synopsis

Anyone, even a novice woodworker or a child with adult supervision, can build this spacious dollhouse. All it takes is six basic tools (a folding rule, square, saber saw, rasp, sander, and hammer) and a single sheet of 4' x 8' plywood. The finished two-story model measures 36 1/2" x 26" (scale 1" x 1') and boasts six rooms, plus a staircase, windows, shutters, and a front door. The easy-to-follow instructions offer advice on purchasing the appropriate kind of plywood and trimmings and explain exactly how to cut and assemble the pieces. Helpful tips include suggestions on sanding, which pieces to nail first, constructing the roof, and finishing the project with paint or siding. The basic house design is simple, so builders have ample room to refine the house to suit their own preferences. Dozens of diagrams and instructions show how to add optical touches such as dormers, windowpanes, a fireplace, flower boxes, and much more. All instructions are clarified by illustrations — over 40 diagrams and photographs appear throughout the book, showing the dollhouse in various stages of completion.

Book Information

Series: Dover Woodworking

Paperback: 48 pages

Publisher: Dover Publications (June 1, 1977)

Language: English

ISBN-10: 0486234932
