The Native Foods Restaurant Cookbook

Synopsis

When people ask Tanya Petrovna, "Are you a strict vegetarian?" she replies, "No, I'm a fun vegetarian!" The visionary behind the Native Foods chain of restaurants, Tanya is known for creating cuisine that is nutritious, organic, compassionate, and delicious. And with signature dishes like her dairy-free cheesecake made from cashew nuts, she proves that healthy, animal-friendly eating can be indulgent and fun. Now, with this book, Tanya's best recipes can be made at home, including: "Fun Mung Curry," "Seitan OlÃ© Mole," and "Rockin' Moroccan Skewers." Plus, there are plenty of outrageous desserts such as "Elephant Chocolate Cake with Cinnamon Peanut Butter Topping," "Sam's Vegan Cheesecake," and "Chocolate French Silk Lingerie Pie." The Native Foods Restaurant Cookbook also contains glossaries of ingredients, utensils, and cooking methods and instructions for making your own seitan from scratch.

I would love to give this book five stars. When I first bought it, I certainly would have. However, as I worked my way through the book and cooked with more of the recipes, I found myself with headaches as often as I had great food. Here's why: This book is not edited well, and it is not written with a beginning or even an intermediate cook in mind. That combination spells disaster. In roughly a third of the recipes in the book, vital details are missing, details that might seem minor to a casual reader or obvious to advanced cooks but mean the difference between beautiful food and a disgusting, and in some cases expensive, catastrophe. Here's a good example. Many of the book's

recipes call for a meat substitute called seitan, a sort of gluten loaf cooked in broth. A recipe for seitan is provided in the early chapters of the book. Interested in making at home what can be a very expensive item in the store, I set out to make seitan one day according to the recipe provided in Petrovna's book. So, I followed the directions to the letter, going through the entire process of making the dough and rinsing out the starch and kneading the resulting gluten ball, a process that takes place over the course of hours. Then, I prepared the broth that the gluten is cooked in - a very salty broth, I should add - and put the whole thing on the stove to cook, a process that also took hours. However, as I put the pot on the stove, I found myself rereading the directions over and over again, hoping that I'd find a clue as to whether or not to put the lid on the pot while the seitan cooked. There was none, except a picture of the seitan cooking, which featured a pot with no lid on it. So I decided to take a chance and leave the lid off.
